

Danger! High voltage!

Do not overload!

Experimental, use at your own risk!

PROJECT: **Nixie Calculator**

BOARD: **High Voltage PSU**

NOTES: Based on the high voltage flyback power supply schematic from the LT3757A datasheet

TITLE: **High Voltage PSU**

REV: **2**

Company:

Sheet: **1/1**

Date: **2025-06-09**

Drawn By: **HighVltGlow**

* changing the value of C9 (e.g., 100pF, 120pF, 180pF), may help if there is audible noise for a certain load

** R8 for variable voltage | R8' for fixed voltage: 150k ~ 170V, 180k ~ 172V
